## Pain points

- Server costs
- Performance issues

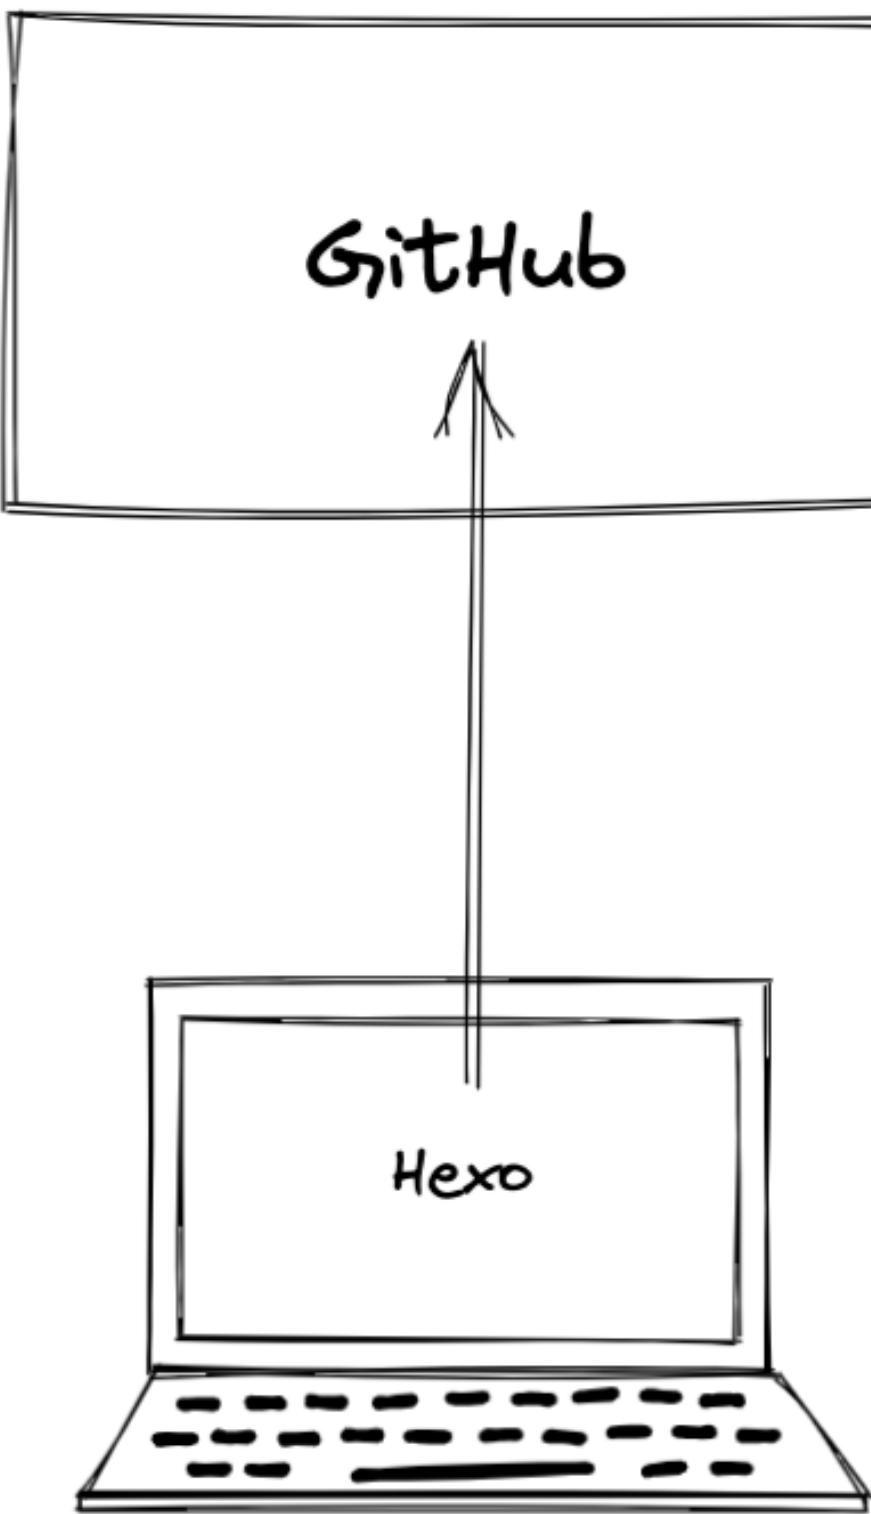

# GitHub Pages

bmpi-dev.github.io

HEXO

xxx.github.io

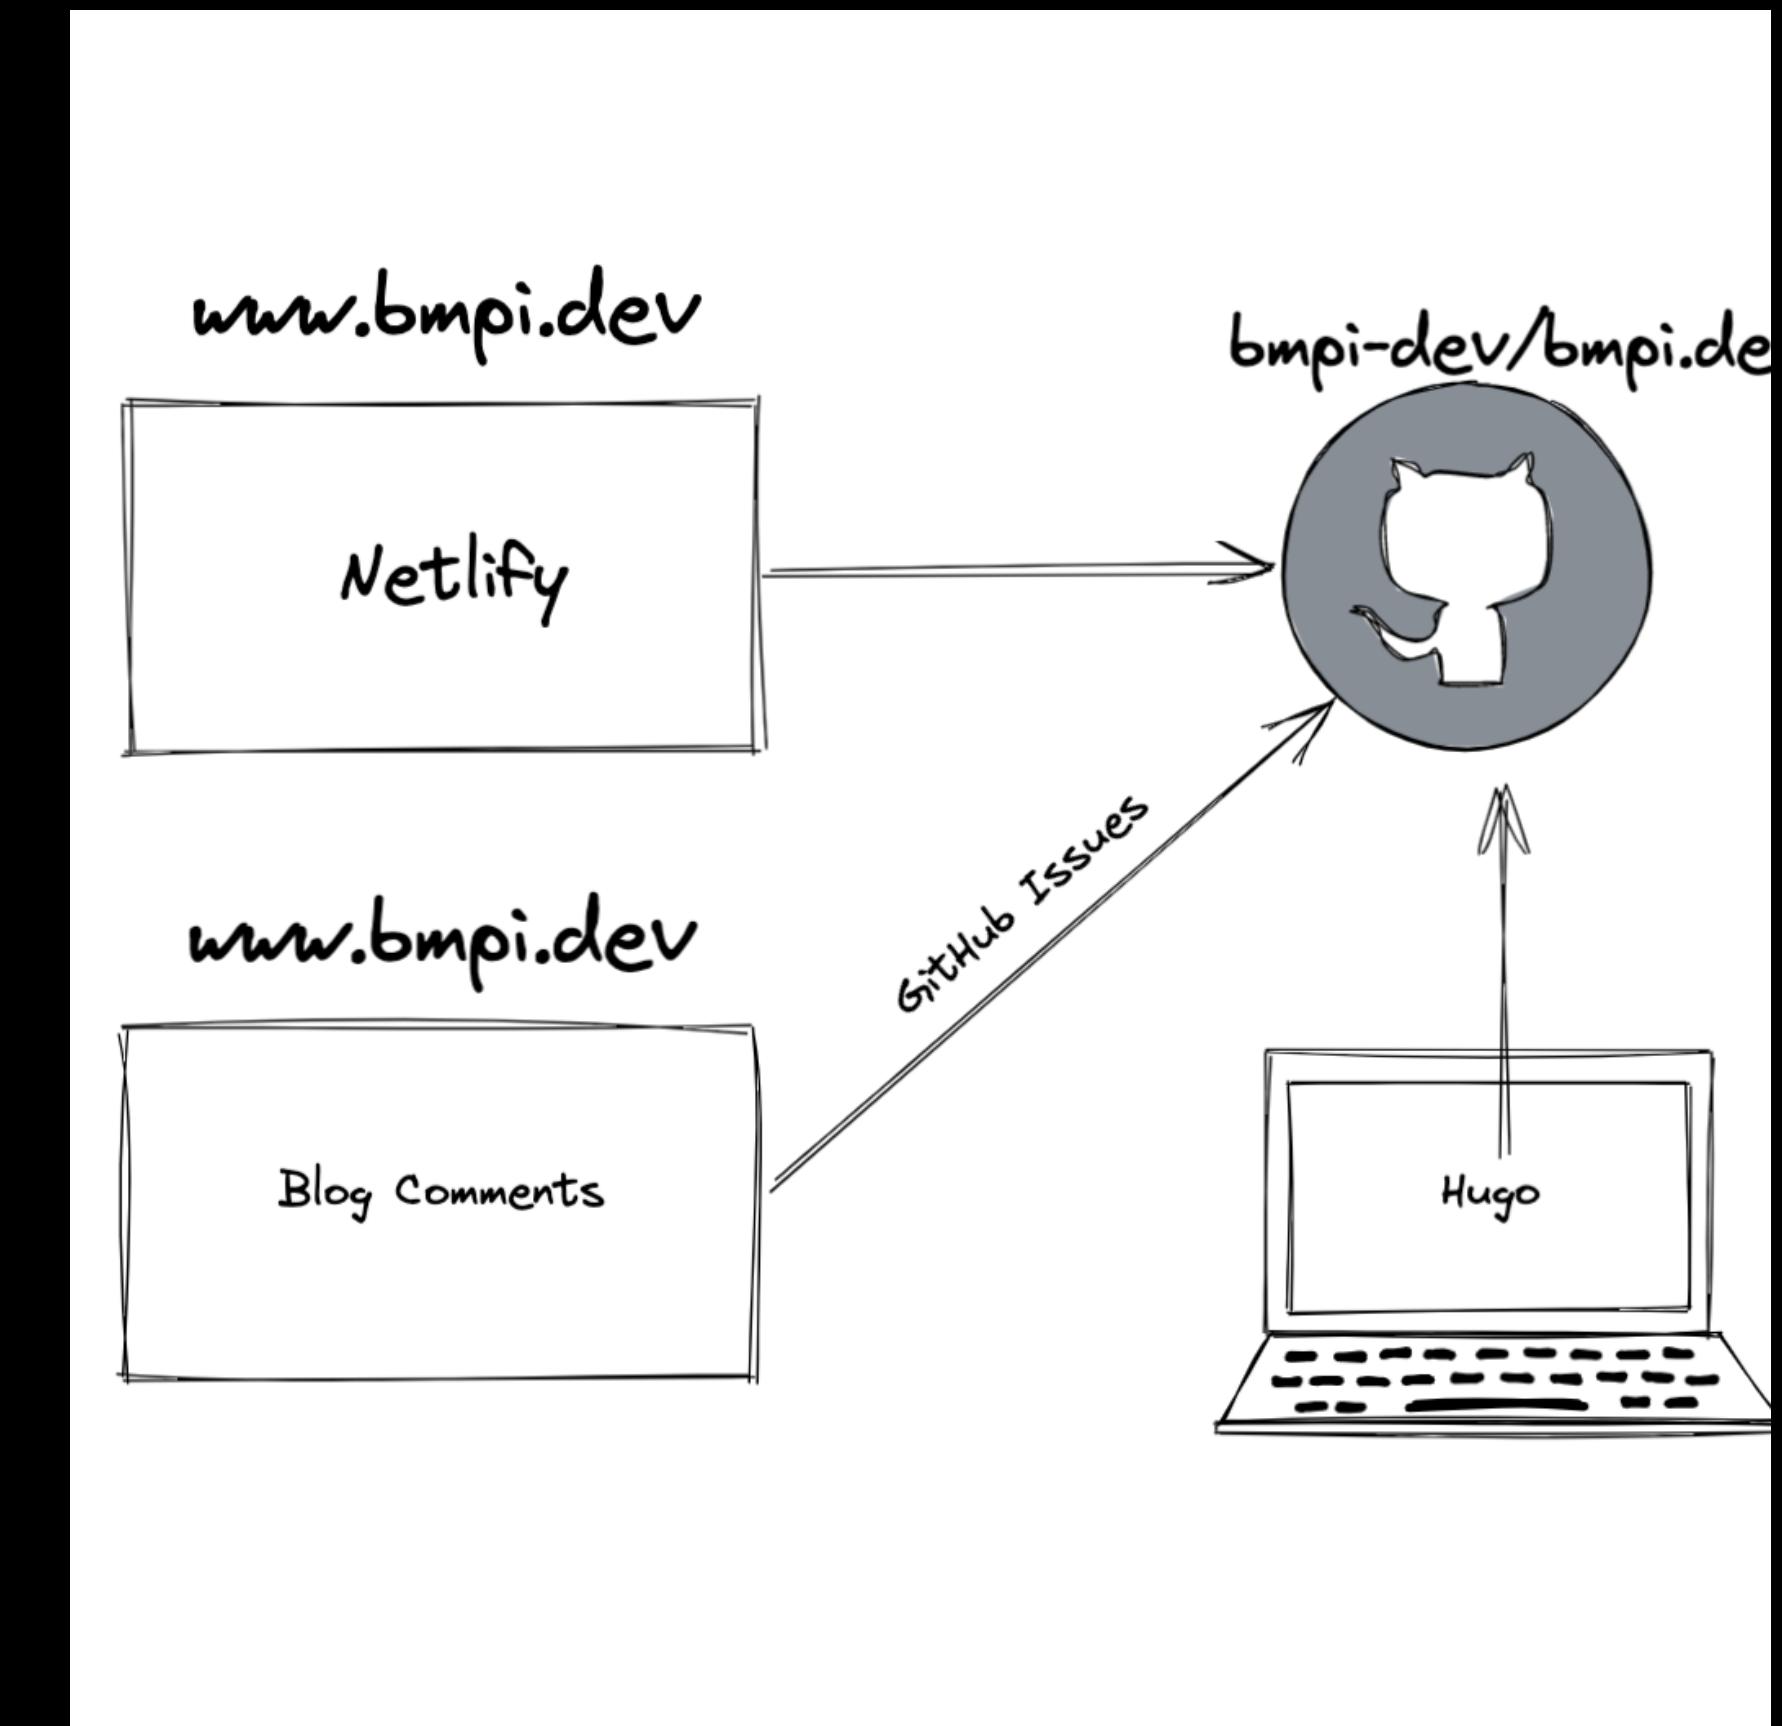

## Pain points

- Hard to customize
- Slow access in mainland China

Netlify  
www.bmpi.dev

HUGO

## Pain points

- Slow access in mainland China

Vercel<sup>v1</sup>

[www.bmpi.dev](http://www.bmpi.dev)

HUGO

## Pain points

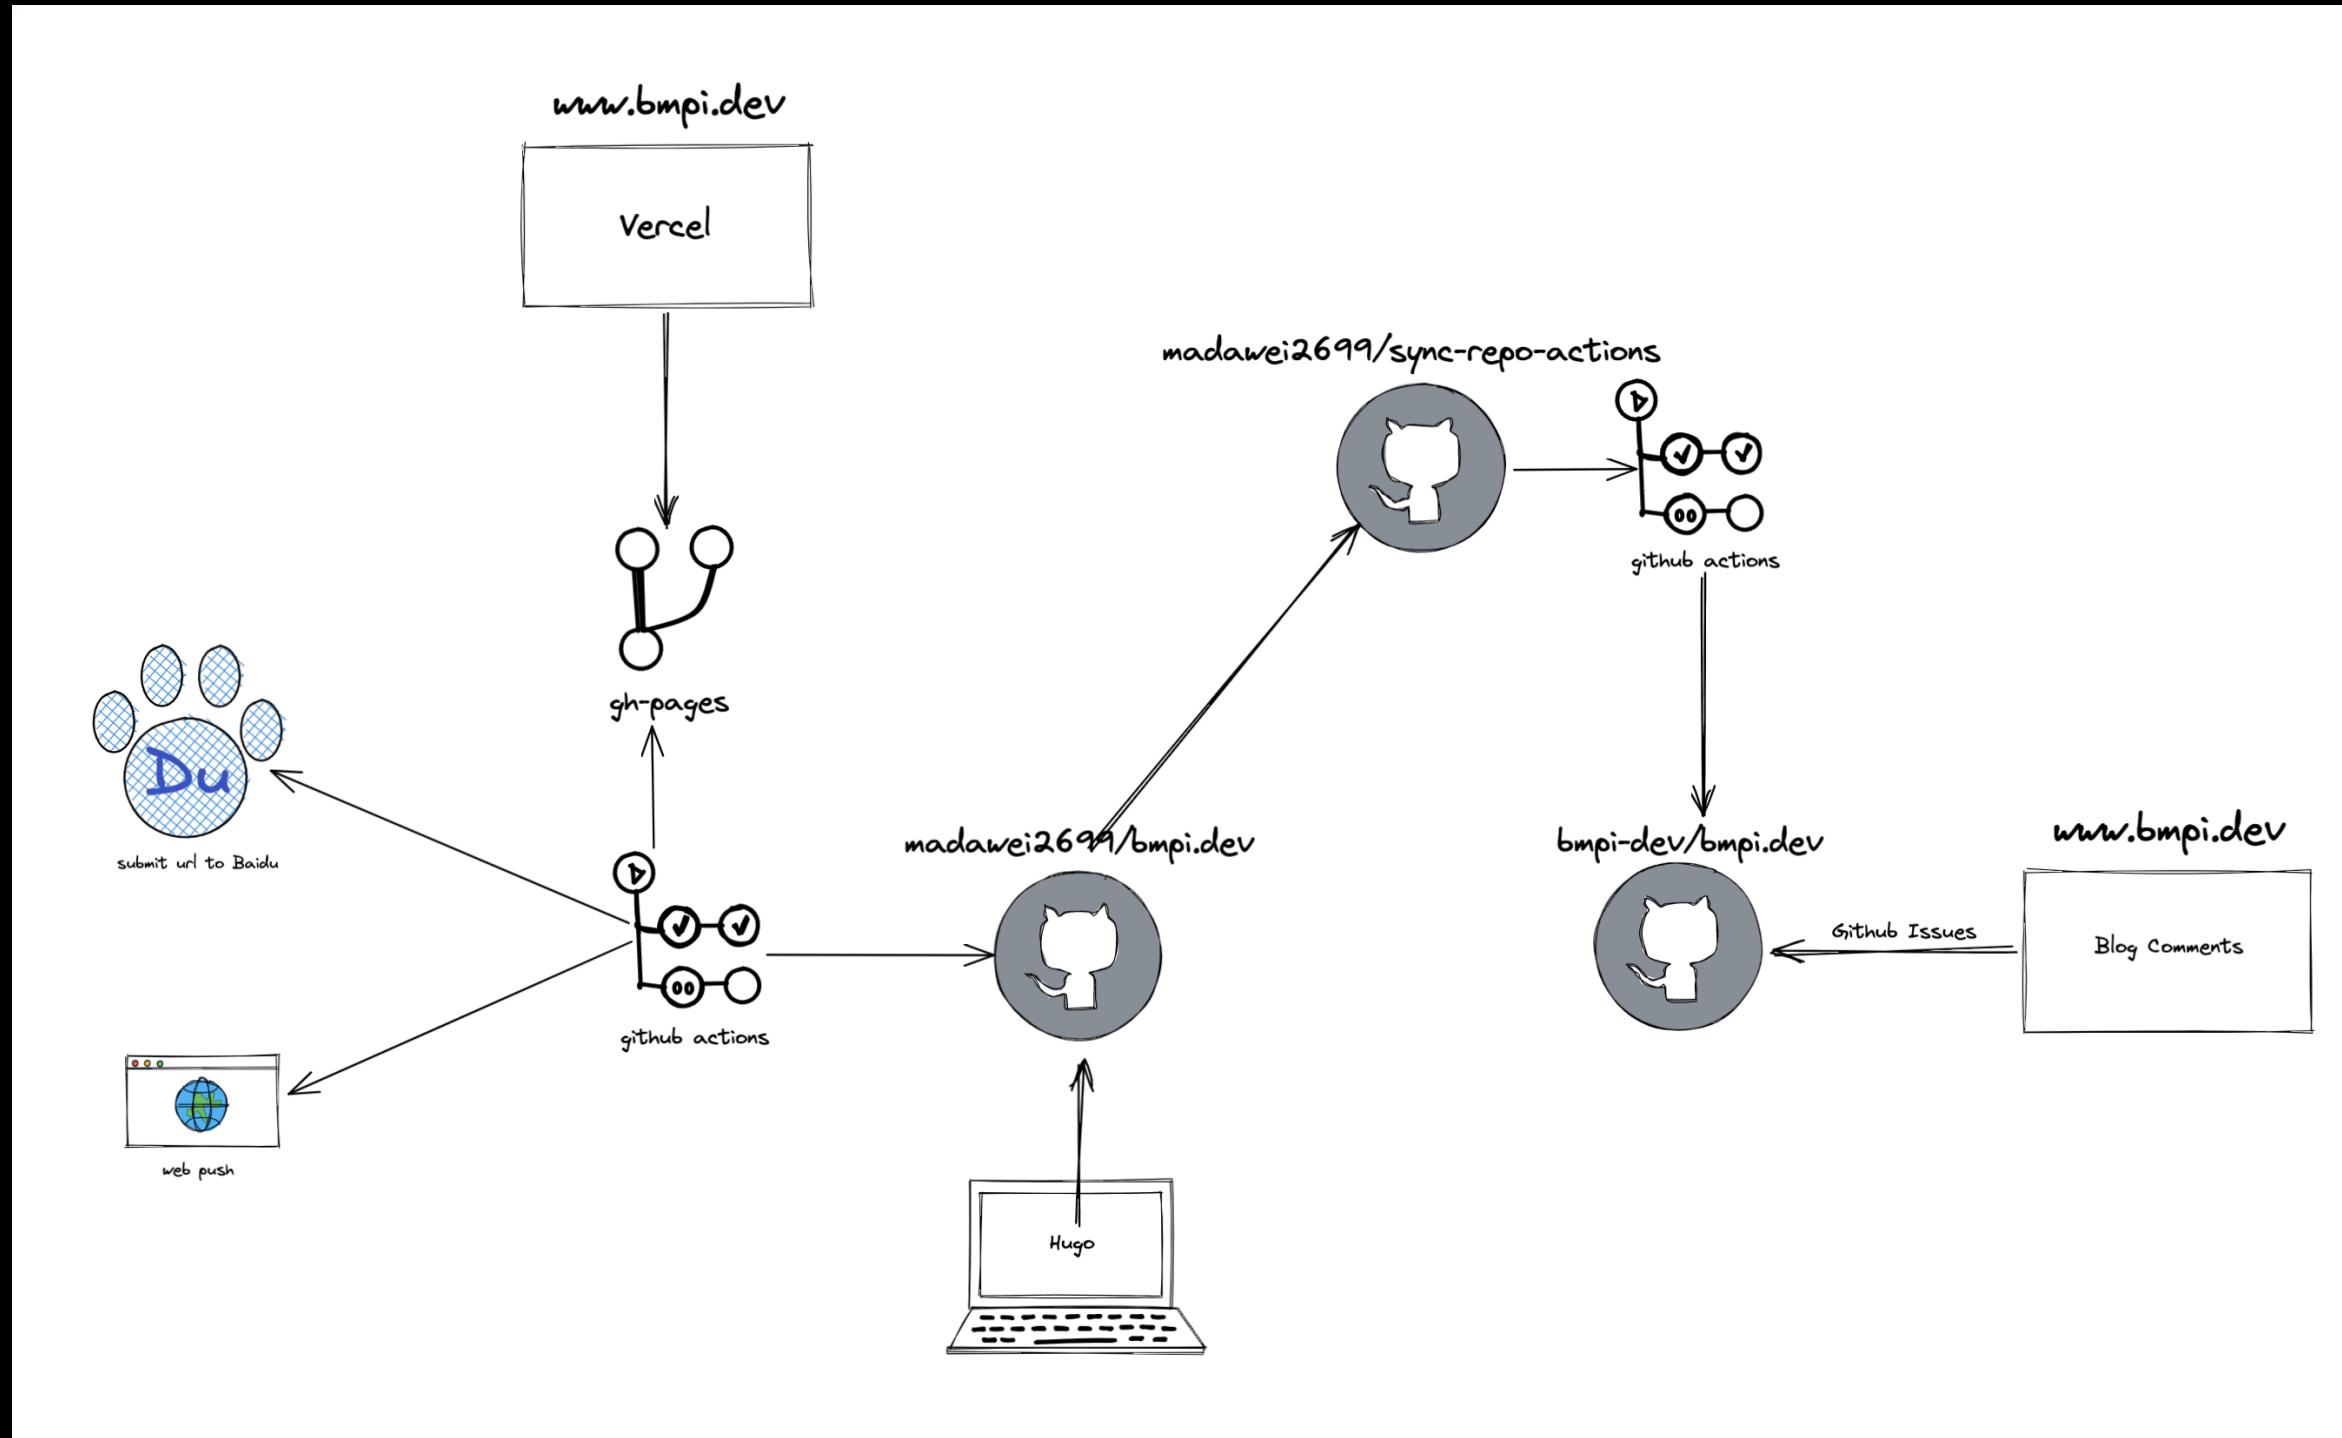

- Inflexible build process
  - Choose a custom image
  - Execute custom tasks at build time

# Vercel<sup>v2</sup>

www.bmpi.dev

HUGO

## Pain points

- Unable to count page visits
  - [api.bmpi.dev](https://api.bmpi.dev)

# Vercel<sup>v3</sup>

api.bmpi.dev

HUGO

## Pain points

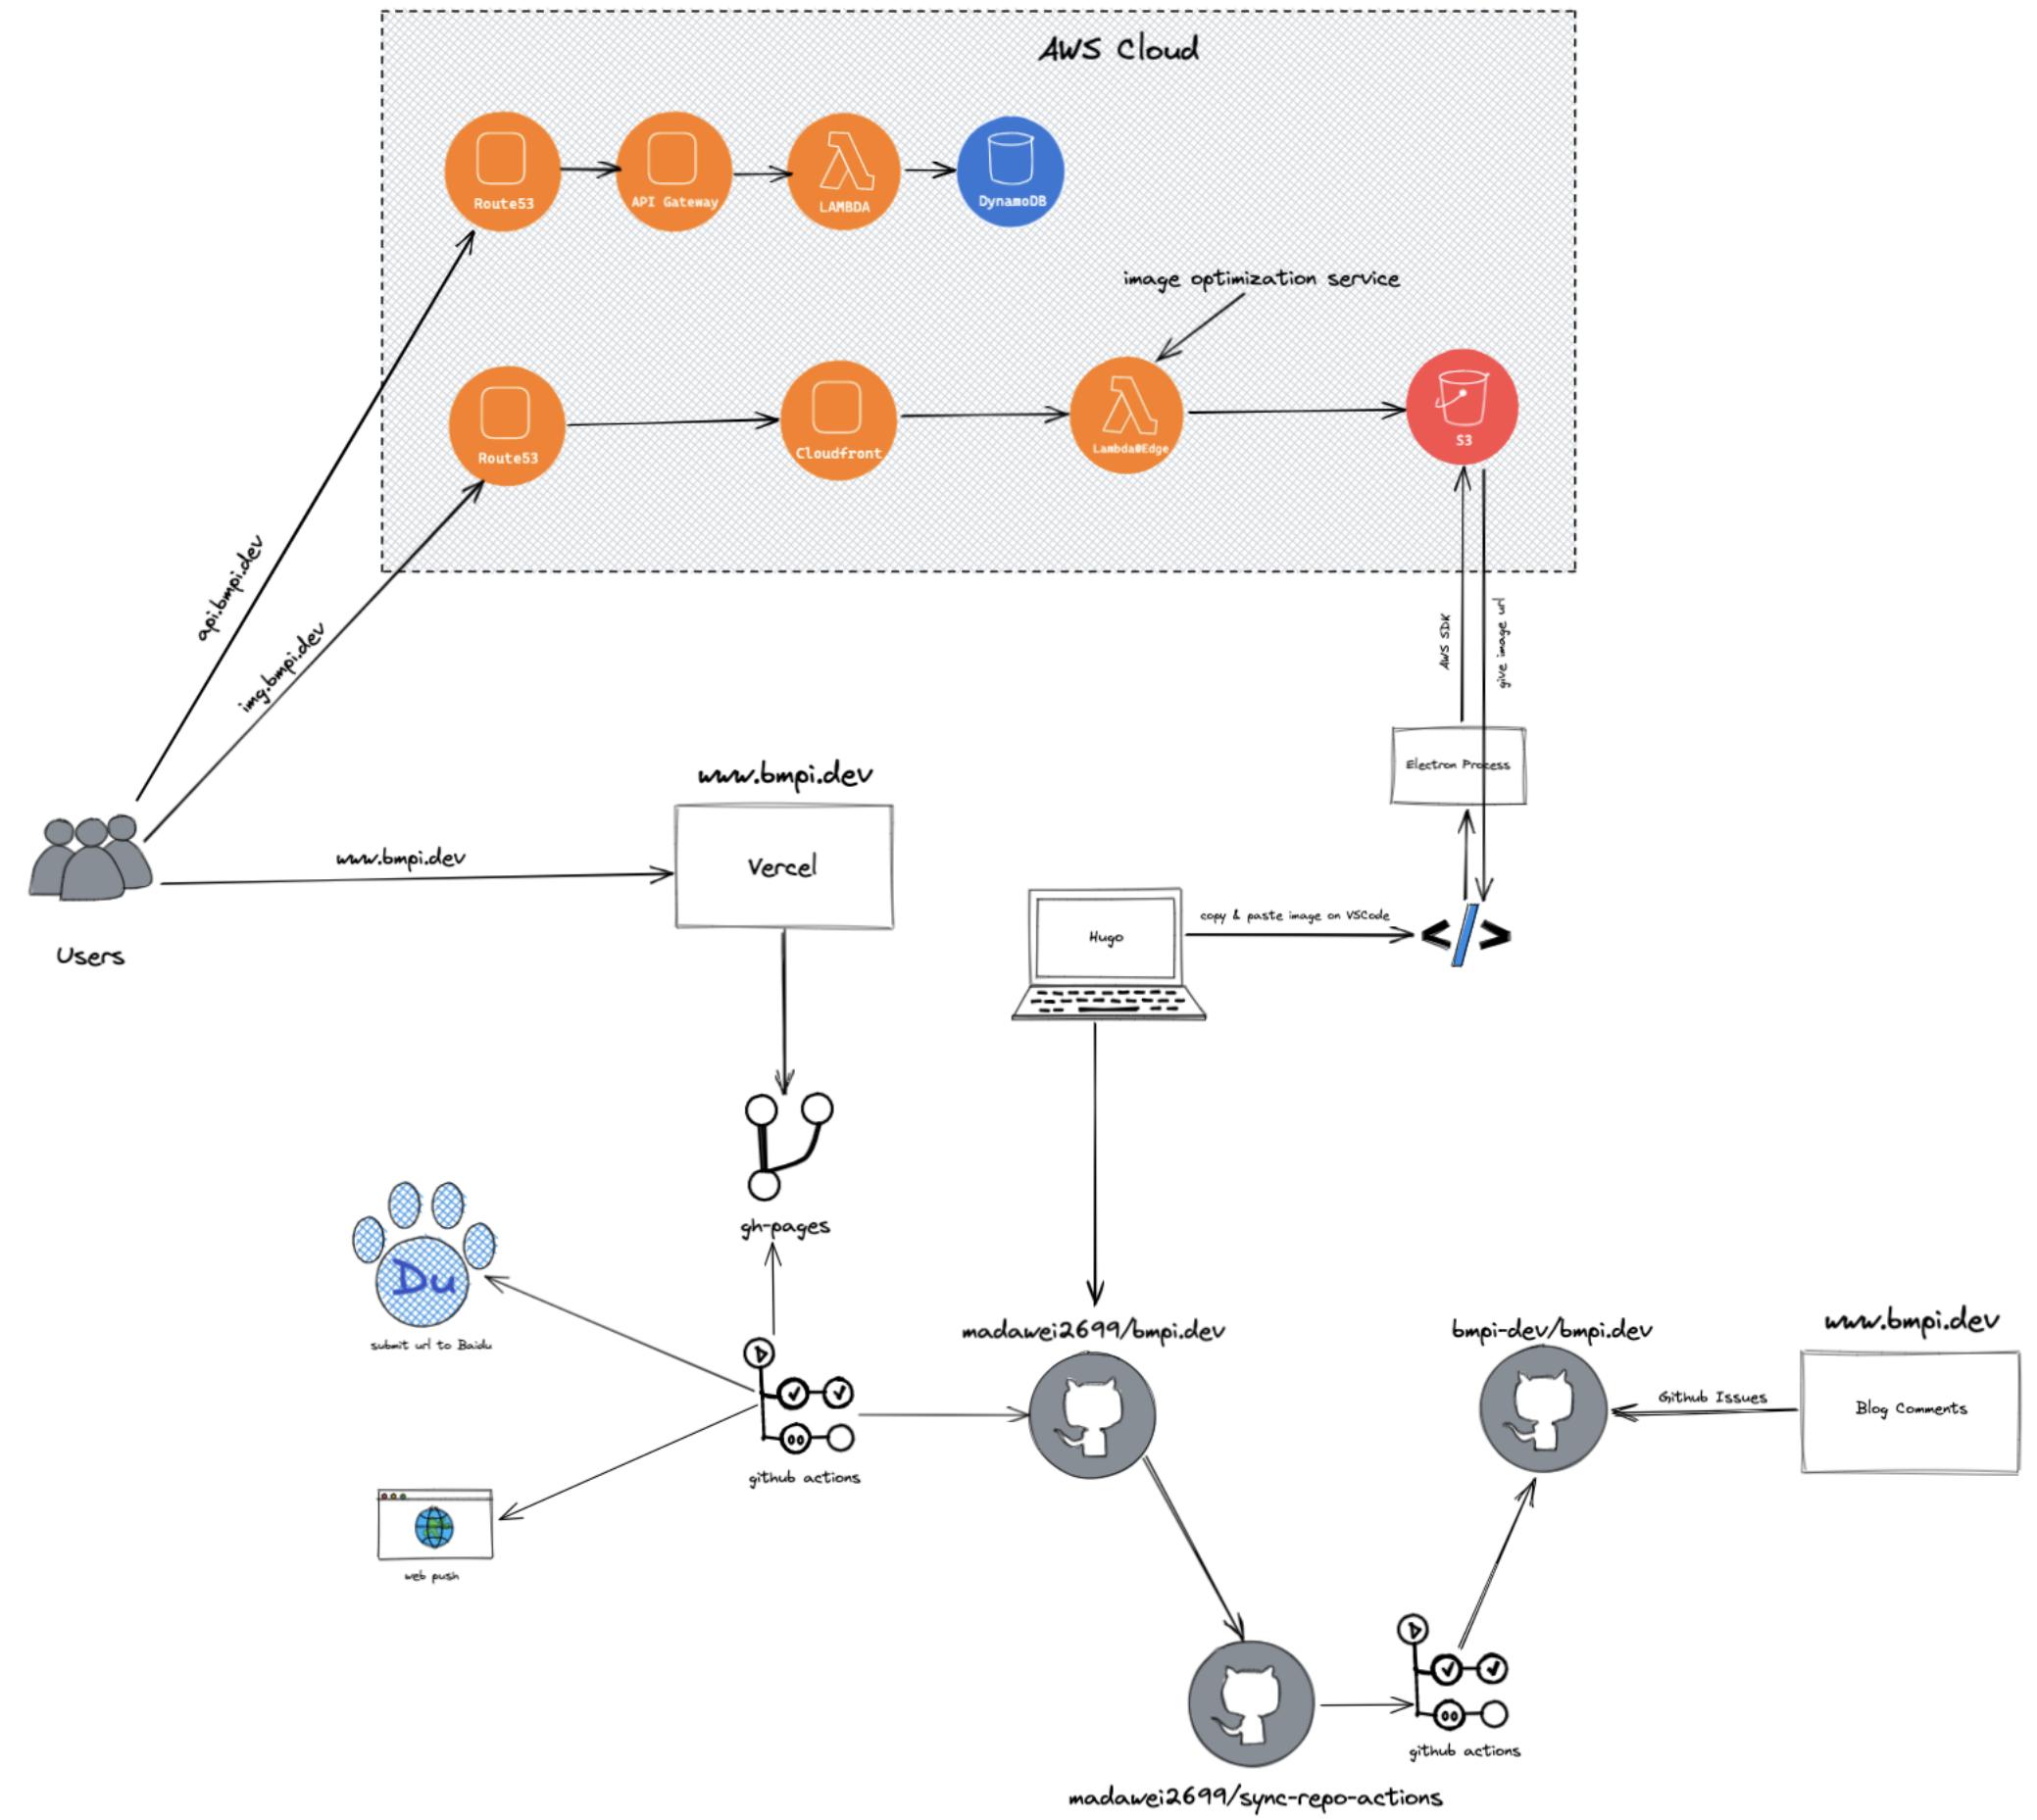

- How about the image?
  - [img.bmpi.dev](https://img.bmpi.dev)

# Vercel<sup>v4</sup>

img.bmpi.dev

HUGO

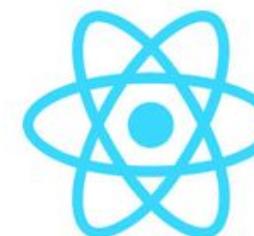

**What is the unified model behind the evolution of blog architecture?**

# JAMstack

**J**

Javascript

**A**

APIs

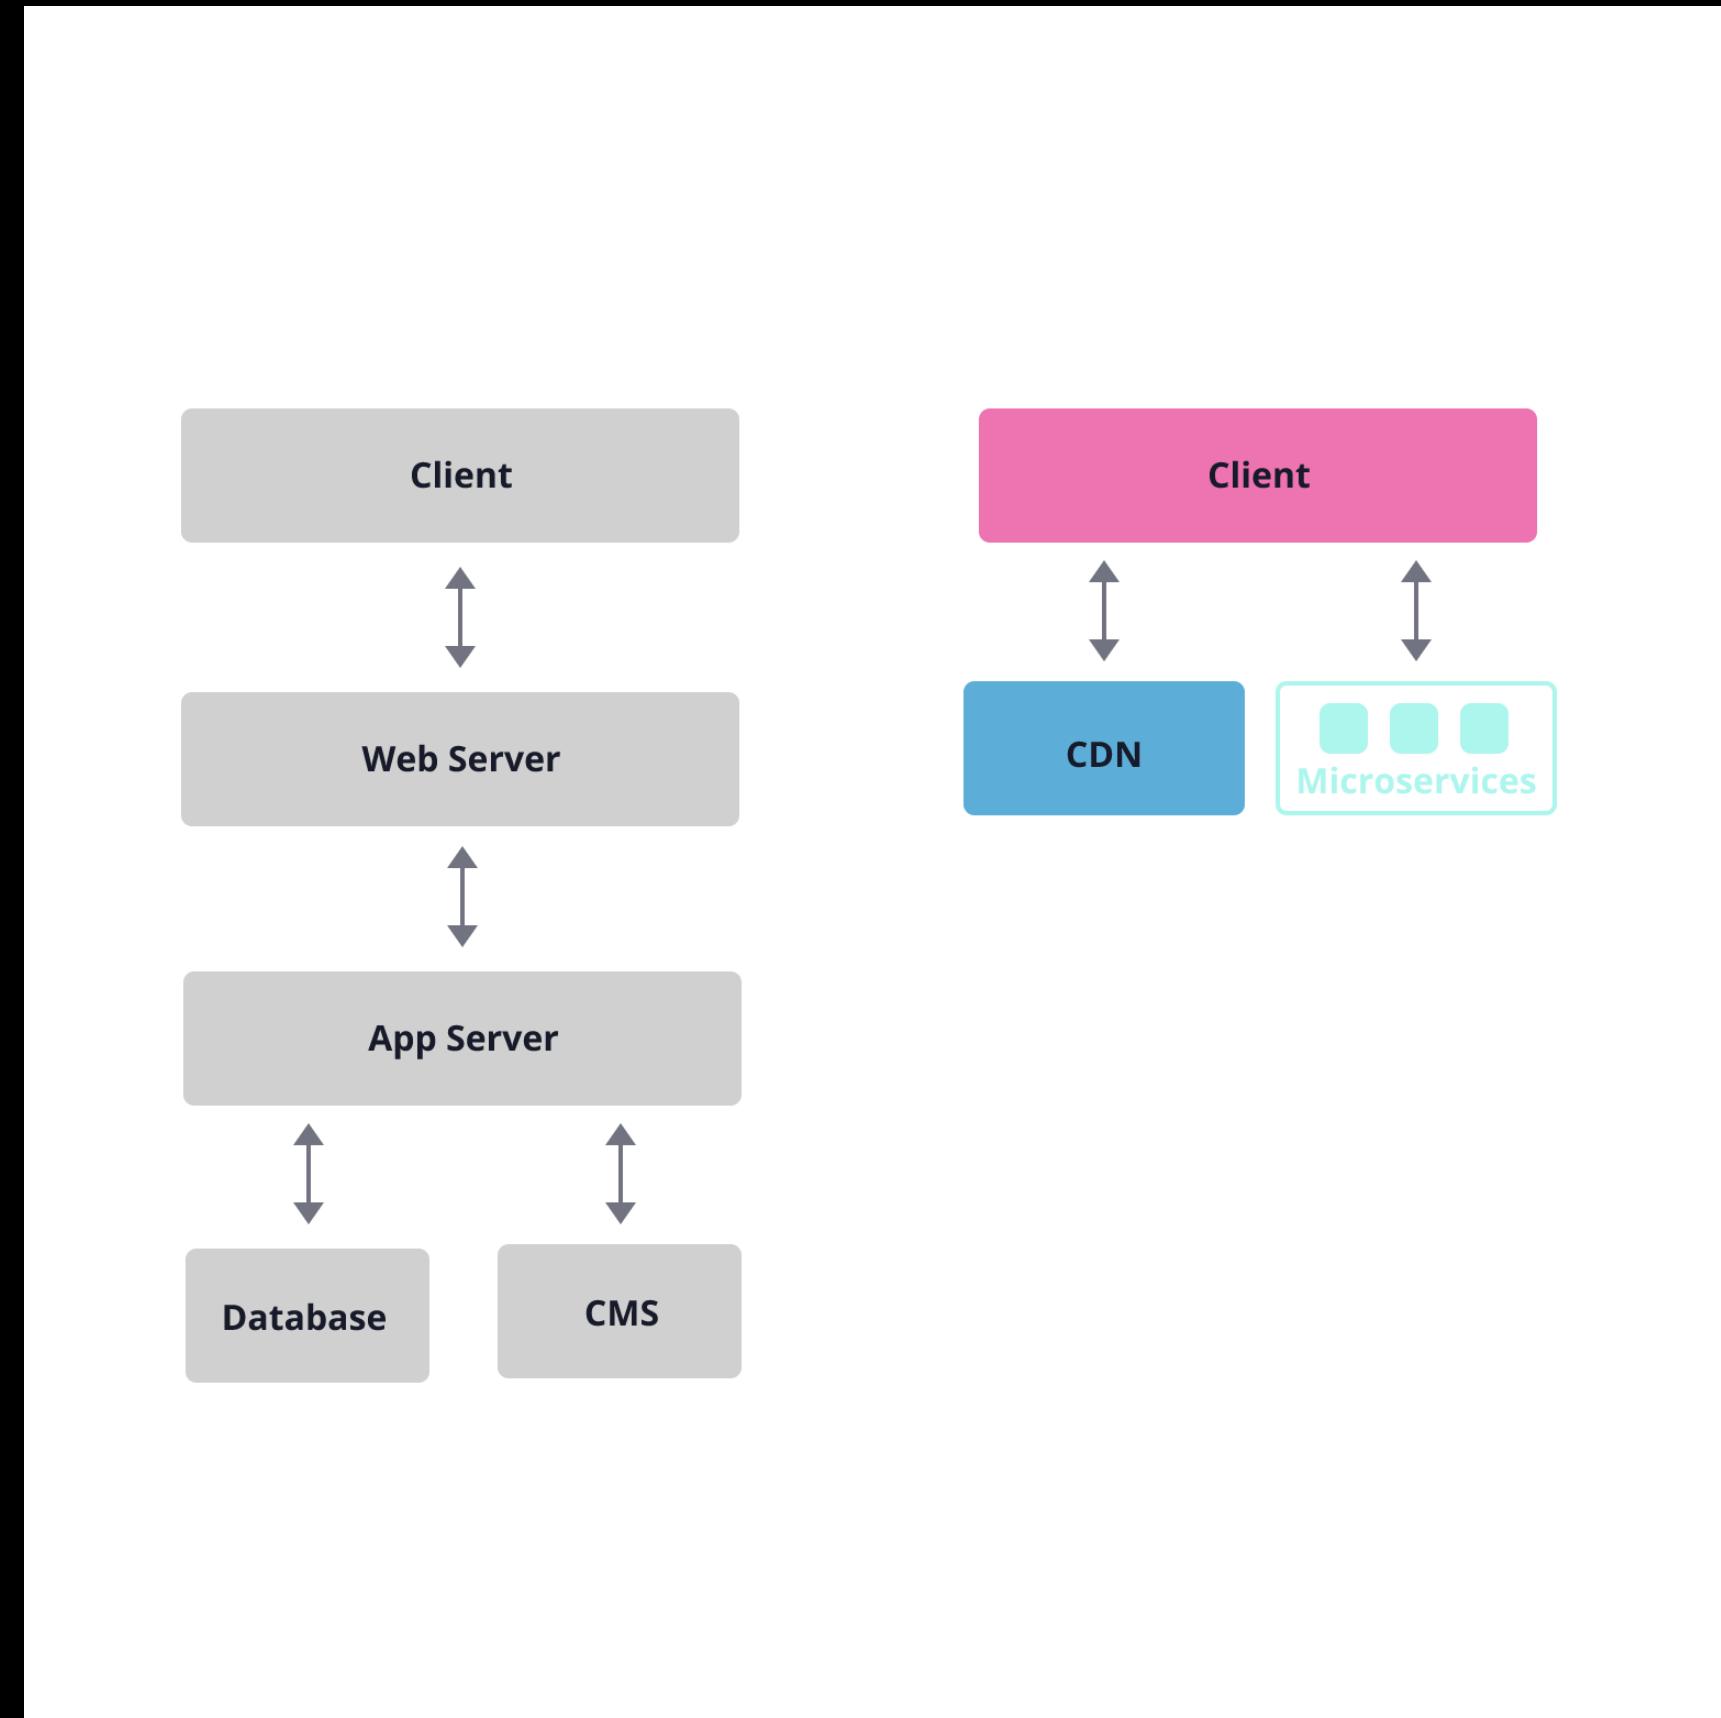

**M**

Markup

# Traditional Web vs JAMstack

- Better Performance
- Higher Security
- Cheaper, Easier Scaling
- Better Developer Experience
